

Company profile

We are a small Swiss private company active since many years in the environmental sector. Our team advises authorities and businesses for a more sustainable use of resources. Our special knowledge includes **energy planning, energy efficiency programs** (e.g. European Energy Award), **air pollution control** and **CO₂ emission auditing**.

Experience in land use planning, water protection, environmental impact assessment and ecological public procurement round out our profile. Thanks to our wide range of expertise, we are able to work well with interdisciplinary experts from different areas.

Profile of potential Romanian business partners

What we are looking for

Our objective in Romania is a long-term strategic partnership with local business partners who are interested in extending their portfolio and expertise in the fields mentioned below. As ideal local partners we envision smaller sized companies with about 5-10 employees who would also like to participate in EU projects and exchange knowledge and experience with us.

Potential business areas

Examples of projects to implement with a Romanian partner

- Creation of energy planning and energy concepts for communities or regions
- Implementation of programs to improve the energy efficiency (e.g. European Energy Award)
- Establishing standards and guidelines in environmental protection and public procurement
- Enforcement of provisions and legal requirements (e.g. air pollution control)
- Support with application for funding and promotion of renewable energy
- Evaluation of exhaust air purification processes
- Teaching programs for technical colleges and polytechnics
